

HOPE NISHIMWE NDINDABAHIZI

Aspiring Software Developer — Embedded Systems & Cybersecurity

Kigali, Rwanda | +250 735 939 385 | hopenishimwe5@gmail.com

PROFILE

Software programming graduate of Rwanda Coding Academy (2023–2026) with hands-on experience across Java, Python, JavaScript/TypeScript, React, and embedded systems. Built hardware/software projects, including a hackathon-stage transformer-theft monitoring system being pitched to Rwanda Energy Group, and a published React/TypeScript component library. Recognized as Best Performing Girl in Rwanda (2023) by the First Lady. Combines full-stack and embedded build experience with active peer mentorship and community leadership.

EDUCATION

Software Programming and Embedded Systems — Rwanda Coding Academy *(Sep 2023 – 2026)*

Coursework and hands-on labs in Java, Python, JavaScript/TypeScript, and embedded systems programming.

O'Level — Ecole Notre Dame de la Providence de Karubanda *(Jan 2020 – Aug 2023)*

PROJECTS

Twatch — Transformer Theft Monitoring System *(2025 – 2026)*

- Team-built embedded system using current sensors to detect and flag tampering/theft of electrical transformer equipment.
- Built the frontend in TypeScript; hackathon submission pending approval, currently preparing a pitch to Rwanda Energy Group (REG).

Real-Time Kanban Board *(2025)*

- Built the frontend in JavaScript with Socket.io for real-time task/board updates across users.

Smart Lock & Face-Tracking System *(2024)*

- Embedded system using ArcFace (ONNX) facial recognition to enroll and identify multiple users from image input.
- Locks/secures a device or asset to a specified enrolled person and tracks their movement when they leave the camera's view.

Utility Billing System *(2024)*

- Java desktop application applying core OOP principles to generate and manage utility bills.
- Implemented tiered billing logic, calculating charges based on volume of water or electricity consumed.

OCR Text Scanner (GUI) *(2024)*

- Desktop GUI application using Tesseract OCR to extract editable text from scanned images, achieving ~90% accuracy.

React/TypeScript Component Library *(2025)*

- Designed and published a reusable UI component library built with React and TypeScript.

SKILLS

Java • Python • JavaScript • TypeScript • React • Socket.io • Embedded Systems • OOP • Cybersecurity Fundamentals (network reconnaissance, penetration testing) • GUI Development • Teamwork, Mentorship & Communication

CERTIFICATES & COURSES

Cyberium — Cybersecurity Fundamentals to Advanced *(Mar 2025)*

- Progressive cybersecurity training from fundamentals through advanced topics, including Python for security, network reconnaissance, and penetration testing.

Rwanda Sign Language Certificate *(Nov 2019)*

- National certificate from Rwanda National Union of the Deaf after a three-month course.

ACHIEVEMENTS

- Best Performing Girl in the Country (2023) — awarded by the First Lady of Rwanda.
- Completed Ideation & Prototyping workshop (Aug 2024).

LEADERSHIP & COMMUNITY INVOLVEMENT

President, Reading Club — Rwanda Coding Academy *(May 2024 – 2026)*

- Led weekly reading sessions for an open-membership club where any member can join and lead sessions; organized peer participation in school-wide literacy competitions.

Volunteer Tutor — Rwanda Coding Academy *(Jul 2024 – 2026)*

- Tutored roughly 80 newly admitted students in math, science, and coding every Saturday evening to help them integrate into school programs.

Lead Sign Language Interpreter — Church *(May 2019 – Present)*

- Interpret weekly services for congregants with hearing disabilities.

LANGUAGES

English (Fluent) • Kinyarwanda (Native)

INTERESTS

Reading • Coding • Cooking • Traveling
